YEARS OF
EXPERIENCE

Introduction

Leo has extensive experience of working in various industries as a Project Manager & Agile Coach, focusing on digital transformation and system development. He has successfully led and executed multiple projects resulting in optimized workflows and significant cost savings, among other accomplishments. His strength lies in combining my technical expertise with the ability to comprehend and address business needs. Leo excel in requirement analysis and team leadership, which has proven invaluable in his previous roles. Leo am passionate about creating solutions that are not only technically robust but also directly impact the success and growth of the business.

Work Experience

IT Project Manager / QueensLab

OKT 2023 -

For our Client, Leo took on the role of Product Owner for a project within emergency and safety vehicle equipment. The project had been ongoing for two years without involving users or delivering a viable MVP. By consolidating requirements from multiple international organizations and collaborating closely with the development team, he established a clear roadmap and reintroduced a user-centered focus. The result was an alpha release that can be tested by real users, laying the foundation for further development.

- Consolidated requirements from four organizations (SE, FR, DE, UK) into a cohesive roadmap and product backlog.

- Reintroduced the MVP concept, enabling testing with real users.

- Conducted workshops to align business and user objectives.

- Established a work agreement for the distributed team, improving processes and software delivery.

- Ensured the solution addressed both technical and business needs with a focus on stakeholder management and requirements gathering.

IT Project Manager / Devies Development

APR 2022 - OCT 2023

At Devies, Leo played a pivotal role in ensuring that our clients' needs and visions become a reality through our software development projects. Whether acting as a client manager, bridging the gap between client requirements and the development team, or as a project manager ensuring that all milestones are met on time, his commitment has been unwavering. As a solution architect, Leo worked closely with both technology and business to create the most optimal and scalable solutions. In his role as a coach, he aimed to elevate and develop the competence of project members, always with the goal of enhancing the quality of what the team deliver. Through all these tasks, a common thread has been evident – his unwavering focus on aligning expectations, optimizing processes, and minimizing waste, to create real value for the clients.

Key Customer Assignments:

Project: Core Banking System Migration

Led a large-scale migration from a legacy core banking system to a modern platform for a Scandinavian consumer bank.

- Mapped out the differences between the old and new systems to identify essential functionalities that required redesign or modernization.
- Designed features and processes to bridge gaps while ensuring alignment with the client's vision and business goals.
- Delivered a highly successful project that resulted in Devies being selected as a development partner for subsequent initiatives, including web solutions and KYC modules.

Project: Certificate Platform for Biogas Producers

Managed the end-to-end development of a system designed to streamline the handling and trading of biogas production certificates.

- Led the project from inception to delivery, ensuring the system addressed the needs of producers and certificate brokers.
- Developed a solution to automatically import certificate data, consolidate it in a database, and generate new certificates tailored to buyer requirements.
- Invested significant time in understanding user workflows and needs early in the project to proactively design features that simplified their processes.

IT Project Manager / Göteborgsregionen

MAY 2019 - APR 2022

As a project manager and solution architect, Leo led a team with the purpose of improving the public sector's position in the procurement and use of digital learning materials. The team aimed to eliminate vendor lock-in, insecure account management, and skewed competition. Instead of costly system procurements, the team transitioned from numerous proprietary ordering solutions to a new standard that consolidated information exchange throughout the product lifecycle. This resulted in automated account lifecycle management prepared for future digital national exams. All solutions were developed with easily implementable open standards, ensuring efficient use of taxpayer money.

Agile

IT Project Manager / Canea Partner Group

MAR 2017 - APR 2019

At Canea, they develop a suite of management systems that span from strategy and project management to daily operations. Leo's role was to implement the solution, educate stakeholders, and coordinate activities to maximize outcomes. Leo's ability to understand and make complex solutions appear simple made him a trusted advisor to use in projects for all types of businesses and industries. Leo had leading roles for key clients in both the private and public sectors. He worked on streamlining processes, mapping, and visualizing them in relation to business management, as well as delivering lectures and e-learning.

Agile

IT Project Manager / CooperVision Nordic

DEC 2015 - MAR 2017

At CooperVision, one of the world's largest manufacturers of contact lenses, Leo had a central role in several different projects. Leo collaborated closely with various departments and represented them in several global IT initiatives. Leo's responsibilities ranged from understanding complex needs to ensuring the success of the projects. He was also responsible for configuring B2C sales tools and providing IT support for external procurement.

Agile

Project Manager / Inserve

APR 2014 - DEC 2015

Leo was responsible for the development and launch of a new e-commerce solution for Macforum. He was also instrumental in creating a video streaming platform for the Gothenburg Film Festival. In addition, He led a team of software engineers in various web and app development projects. Leo's passion was, and still is, to precisely understand what the customer wants, formulate a vision, and then realize that vision with the help of the team. Leo's main tasks included requirement analysis, sprint planning, implementation, and performance monitoring
